VACCINES ARE EXTREMELY SAFE

How do you know that a vaccine is safe?

- Vaccines undergo very **strict testing** to make sure they're safe.
- So even after a vaccine has been approved, scientists **continue checking** it.
- **Millions of people** around the world get vaccinated.
- Serious **side-effects** are very rare.
- Vaccination is much safer than getting the disease itself.
- Some illnesses are **life-threatening**. Vaccinations prevent you becoming seriously ill or even dying.
